

ENKHTUR ENKHBAT

Sydney, NSW | eenk0496@uni.sydney.edu.au | +61 432 116 853

EDUCATION

University of Sydney	Expected 2028
Bachelor of Advanced Computing	
New York University	2025
Business & Finance Coursework	
American School of Ulaanbaatar	2021-2025
High School Diploma	

WORK EXPERIENCE

Moneyport	2026-Present
<i>Co-Founder & Chief Technology Officer</i>	
- Co-founded an Australian peer-to-peer currency exchange platform to eliminate scam risk; designed the schema, built the backend in Python and PostgreSQL, containerised with Docker, deployed via CI/CD. - Wrote technical specifications translating business requirements into buildable features; reviewed each release against the spec to catch mismatches before shipping. - Debugged and resolved issues across the stack, identifying root causes in the backend, database, and deployment pipeline.	
Mongolnet NSP	2026
<i>Software Engineering Intern</i>	
- Designed ERDs and relational database structures for a classroom management app covering assignments, announcements and submission tracking. - Built the core backend in TypeScript, integrated with Mongolnet's platform via REST API with token-based authentication across student, teacher and administrator roles. - Debugged integration issues between the app and Mongolnet's platform, resolving authentication and data flow errors across the REST API.	
Education Globally (UK)	2024
<i>Business Manager & Developer</i>	
- Built and launched client websites; wrote SOPs detailed enough for new staff to work unsupervised. - Produced client-facing documents, formatted reports and web copy to a consistent style.	
GrowthCreek LLC (NYC)	2024-2025
<i>Junior Management Associate</i>	
- Conducted financial analysis and market research across business development projects, producing findings used in client pitch materials. - Built and maintained data sets and project trackers, improving reporting turnaround for the team.	

PROJECTS

Caplora, 2026 - AI-powered production-readiness platform scanning AI-built code for security, reliability, database, and cost risks. Follows a Detect, Prove, Fix, Verify loop: finds problems with evidence, generates a patch, and re-scans to confirm the fix.

Automated Content Pipeline, 2025 - End-to-end automation using n8n, ChatGPT and ElevenLabs; designed and iterated prompts to generate scripts and voiceovers reliably.

Digital Agency, 2024 - Websites and resources for early-stage founders; 9 clients in year one.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, SQL, HTML & CSS

Frameworks & Tools: React.js, PostgreSQL, REST APIs, Docker, CI/CD, Git, GitHub, Node.js

AI & Automation: Prompt engineering, agentic AI, n8n, RAG, MCP, LangChain

Other: Algorithms & data structures, requirements writing, ERD design, SOP documentation, UI/UX design
